# Mission

The University of Tokyo aims to be a world-class platform for research and education, contributing to human knowledge in partnership with other leading global universities.

The University of Tokyo aims to nurture global leaders with a strong sense of public responsibility and a pioneering spirit, possessing both deep specialism and broad knowledge.

The University of Tokyo aims to expand the boundaries of human knowledge in partnership with society.

## The University of Tokyo and Todai

In English we are known as the University of Tokyo and in Japanese as Tokyo Daigaku (東京大学), which literally translated is "Tokyo University." In Japanese, however, compound words are often abbreviated to just the first character of each component. Abbreviating Tokyo Daigaku leaves Todai (東大), which is how most people refer to us in Japan. In 2013, the University of Tokyo announced that the abbreviated English name of the University would be UTokyo.

# About the University

*The University of Tokyo is Japan's top university, a world-class center for research, and a vibrant academic community.*

## World-class research

---

The University of Tokyo's researchers have been at the forefront of their fields since our foundation in 1877. Today, their leading-edge research regularly appears in top international journals and has earned multiple Nobel prizes. Research at the University of Tokyo across the arts and sciences is both broad and deep, as specialist knowledge is shared across traditional boundaries to further human understanding.

## A robust education

---

The University of Tokyo's undergraduate education emphasizes the liberal arts for the acquisition of strong communication skills, a sound ethical framework, and interdisciplinary awareness, together creating a solid

foundation for specialized knowledge. Volunteer activities, internships and other off-campus experiences are an increasingly important part of a University of Tokyo education.

## A vibrant community

---

The University of Tokyo is a vibrant community in which world-class researchers work together with excellent students from Japan and more than 100 other countries. Alumni fill leading positions throughout Japan, Asia, and increasingly around the world.

## Academic and administrative staff

The University of Tokyo is a major employer with 10,466 staff members. Our academic staff numbers 5,903. The University lists positions as permanent or fixed-term,

which applies to the post, not the person. About two-thirds of academic staff members in permanent posts (from research assistant to professor in the table) have tenure; the remainder are on fixed-term contracts. Most other staff members in permanent posts are on permanent contracts.

Academic and administrative staff	Permanent posts			Fixed-term posts			Total
	Male	Female	Subtotal	Male	Female	Subtotal	
Professors	1,254	68	1,322	91	9	100	1,422

## Foreign academic and administrative staff

An increasing number of our staff members come from overseas. Currently, 9% of our faculty are foreign. In addition, many researchers visit us for short periods, creating an international environment in which our international staff can feel at home. The figures above include staff members in both permanent and fixed-term positions. The University is also exploring the joint appointment of faculty with overseas institutions in order to increase the number of foreign faculty members.

# Education

*Highly competitive admissions, extensive international partnerships, and a tradition of liberal arts education ensure that the University of Tokyo provides a diverse and highly stimulating intellectual environment.*

## A competitive environment

Domestic students applying to the University of Tokyo take the common national university entrance examination, following which exceptional candidates can choose to take the University's demanding entrance examination. The number permitted to take this exam is limited so there can never be more than between 2.5 and five applicants for each position. The dates for graduate admissions vary widely. Please check the website of each Faculty or Graduate School for further information (page 28).

On average, about one in four applicants to undergraduate programs is successful, and 47% to MA programs. Three-quarters of applicants to PhD programs are successful, but this includes many students who enroll in combined MA/PhD programs. Roughly one in two external applicants to PhD

programs is successful.

## Degree programs offered in English

A growing number of graduate-level courses and degree programs are offered in English. Options in English for undergraduate students include the four-year degree program PEAK (Programs in English at Komaba) and the third-year transfer program GSC (Global Science Course). For more information on English programs at UTokyo, please visit the following website: <http://dir.u-tokyo.ac.jp/ICE/>

## Undergraduate education

Undergraduate education at the University of Tokyo is divided into junior and senior divisions, each being two

years in length. In the former, students study a liberal arts-based curriculum on one of three humanities, three sciences, or one general program. In the latter, students go on to specialized study in their chosen Faculty.

Undergraduate division	Applicants	Successful applicants	Other	Total entrants
Humanities I	1,226	415	10	425
Humanities II	1,077	355	12	367
Humanities III	1,488	481	27	508
Sciences I	2,984	1,185	19	1,204
Sciences II	2,131	563	15	578

<b>Total</b>	<b>5,956</b>	<b>2,889</b>	<b>1,017</b>	<b>359</b>	<b>1,714</b>	<b>1,259</b>

## Enrollment

The University of Tokyo has 27,348 regular students, roughly evenly divided between undergraduate and graduate students. Graduate students themselves are divided almost evenly between MA and PhD programs. International students number 2,422 or 9% of the total, with most enrolled in graduate programs. Male students outnumber female students four to one among domestic students. Of international students, 58% are male and 42% are female.

Group		Undergraduate	MA	Professional	PhD	Total
Domestic students	Male	11,262	4,529	558	3,389	19,738
	Female	2,497	1,182	228	1,281	5,188

## International exchange

### Study abroad

University of Tokyo students benefit from a wide range of academic exchange agreements with other universities. In 2013, 393 students visited our partner universities. Most of these were graduate students (79%). The University hopes to increase the number of undergraduates that make use of exchange opportunities.

### International students

In May 2013, 2,873 international students enrolled in programs at the University of Tokyo, 451 (16%) as research students and 2,422 (84%) as full-time students. Approximately 10% of international students studied at the undergraduate level, while around 90% studied at the graduate level. The University is increasing the number of programs available in English at both the undergraduate and graduate levels, so we expect to see an increase in the number of undergraduate international students in coming years. Additionally, many students join us for short periods during their studies at their home universities.

## Admissions

Students can study at the University of Tokyo as either regular students (degree candidates) or research students. Admission is in April and October. To be eligible for admission to an undergraduate program, students should have completed twelve years of formal education equivalent to that in Japan, or have been awarded an International Baccalaureate by the International Bureau of Baccalaureates. (See the PEAK website for entrance requirements for that program.) To be eligible for an MA or PhD program, students should have at the time of admission a bachelor's or Master's degree or a level of education equivalent to that of a Japanese university. Eligibility for admission to a combined MA and PhD program is the same as that for an MA program. Students may also be admitted if the University recognizes that they have suitable academic background and experience to undertake their studies. Admission is granted to most programs after a written examination, but there are a few graduate programs that accept students on the basis of past academic attainments, letters of reference and essays. Please contact the relevant Faculty or Graduate School for more details (see page 28).

# Campus life

*The university environment lets you focus on your research and studies so that you can perform at your best, but you are also a member of a community that provides effective support when the occasion demands.*

## Support for students and researchers

As the preeminent academic institution in Japan, the University of Tokyo has a long history of nurturing and promoting academic excellence. The International Center has offices on each of our main campuses and provides support for international students and researchers coming to study at the University and for our students studying at our partner institutions around the world. The International Center also offers advice on academic and personal matters, as well as mental health counseling for individual and family problems. The Center for Japanese Language Education provides Japanese language education for international students and researchers. The University Career Center arranges job fairs and provides information for students nearing the end of their studies.

[www.u-tokyo.ac.jp/url/aac](http://www.u-tokyo.ac.jp/url/aac)

## Scholarships

Our domestic and international students are supported through the University's own scholarships and tuition fee waivers, and through scholarships from the Japanese government, companies and foundations. A large proportion of our international students are funded through such programs. One of the best places to start looking for information about scholarships is on our website. The Japan Student Services Organization (JASSO) website also provides details about scholarships and studying in Japan. Applicants are encouraged to apply for the Japanese Government (MEXT) scholarships, more information about which can be obtained from the Japanese consulate in your home country.

[www.u-tokyo.ac.jp/url/aad](http://www.u-tokyo.ac.jp/url/aad), [www.jasso.go.jp/index\\_e.html](http://www.jasso.go.jp/index_e.html)

## Accommodations

Accommodations for students and researchers at the University of Tokyo are managed by the Housing Office. While University accommodation reserved for international students can house only a small portion of those who join us each year, the accommodations available are increasing and students also have access to student accommodation managed by other organizations, rooms in company dormitories and private accommodation. Further information is available on the University website.

S = accommodation reserved for students, R = reserved for researchers. Data correct as of April 2014.

## Student life

At the University of Tokyo we value our links with society, and students organize two public festivals that provide visitors with a glimpse of university life. In addition, the University holds an annual open campus event which introduces university life to several thousand high school students from all over Japan each year. Increasingly, prospective international students also attend this event. Students also engage in a variety of sports and cultural activities through student clubs.

# Research

*Standing on the strong foundations built up by their predecessors, our researchers are consistently at the cutting edge across the full spectrum of academic endeavor.*

## Research facilities

Excellent facilities support research and education at the University of Tokyo, including a superb library system, the University Museum and two major hospitals, which are also open to the public and are a point of contact with the local community. Cutting-edge facilities including supercomputing resources support University members' research.

### University Library System

While the General Library on the Hongo Campus contains a large collection of books, journals and other materials in Japanese, English and other languages, the majority of specialized materials are held in the 32 departmental libraries that comprise the University Library System. The

system holds over 9 million books, nearly half of which are foreign. The largest portion of foreign books are in English, but there are also significant collections in other major languages. There are also over 160,000 journals, nearly half of which are in foreign languages. The Library actively purchases materials as required for research and education. An increasing quantity of material is digitized in the University Repository.

### University Museum

The University Museum is the largest of its kind in Japan, with a collection of over three million items. The Museum holds materials to support research and education at the University of Tokyo gathered since the University's foundation in 1877, and fixed and mobile exhibitions are often open to the public.

	Total books		Total journals	
	Total	Foreign	Total	Foreign
Faculties and institutes	7,727,095	3,697,006	122,971	53,448

Kashiwa Library	388,766	282,999	22,163	15,563
<i>Total</i>	9,350,046	4,405,960	166,258	78,653

Data correct as of March 2014.

### University Hospitals

The University of Tokyo has two major hospitals, both of which were instrumental in the introduction of western medicine into Japan. The Faculty of Medicine University Hospital grew out of the Kanda Otamagaikē Vaccination Center founded in 1858, and strives to provide the best possible individual care. The smaller Institute of Medical Science Research Hospital was established in 1894 and specializes in translational research, aiming to bridge the gap between basic research and the bedside.

### Industry and government cooperation and outreach

The University of Tokyo is committed to ensuring the

transfer of our research outcomes to society, and industry cooperation is one of the most effective means of achieving this. Nearly 200 Japanese and foreign companies partner with us and fund almost 100 research projects, a mainstay of our research and one that provides a significant portion of research income. To support effective research and positive outcomes, collaborative research is first evaluated through the Proprius21 process, which ensures common understanding of research goals, establishes metrics and milestones for measuring progress, and determines ownership of results and intellectual property. In addition, the best of the University's research is promoted on the UTokyo Research website. [www.u-tokyo.ac.jp/url/aae](http://www.u-tokyo.ac.jp/url/aae)

## Interdisciplinary research

The University of Tokyo promotes both inter- and intra-university interdisciplinary research, through the establishment of interdisciplinary institutes such as the Kavli Institute for the Physics and Mathematics of the Universe (Kavli IPMU), and networks of researchers from multiple disciplines across multiple universities, such as the Network for Education and Research on Asia and the Institute of Gerontology.

## International research

The University of Tokyo aims to create a campus that is a premier platform for education and research and celebrates the world's diverse cultures, values, and languages. Consequently, the University of Tokyo is an important part of several regional and global university networks to promote collaboration in research and exchange of researchers, including the International Alliance of Research Universities (IARU), the Association of East Asian Research Universities (AEARU), and the Association of Pacific Rim Universities (APRU). Some of our world-leading institutes are created as centers of international cooperation, such as the Kavli IPMU.

## Exchange of researchers

Of the University of Tokyo's 412 academic exchange agreements, 381 include a research element and our researchers make active use of these agreements to engage in research throughout the world. In 2013, researchers from the University of Tokyo registered 10,704 overseas research visits, and researchers from other institutions registered 3,872 visits to our campuses.

Region	Dispatched	Accepted

<i>Total</i>	10,704	3,872

# Finances

*As a national university corporation partly supported by the Japanese public, the University of Tokyo has a responsibility to ensure the efficient use of funding, and implements effective auditing and transparent accounting practices*

## 2014-2015 Budgeted revenue

Over one-third of University income comes from government subsidies. Research grants and collaborative research with industry and government provide an additional one-third. The University Hospital is another major source of revenue, accounting for more than one-sixth of the total. Tuition fees account for approximately 8%.

## 2014-2015 Budgeted expenditure

Over one-third of the total expenditure is spent on research and research grants. Nearly another third goes to personnel costs. The remaining major expense is purchasing material items, which includes all research materials.

Budgeted revenue	Amount (million yen)	%
Government subsidies for management expenses	81,134	34.4
Collaborative research and endowment projects	55,646	23.6
University Hospital	44,131	18.7
Research grants	27,633	11.7
Student tuition fees	18,588	7.9
Subsidies for facilities construction/maintenance	8,708	3.7
<i>Total</i>	235,840	100.0

Budgeted expenditure	Amount (million yen)	%
Personnel	77,018	32.7
Collaborative research and endowment projects	55,646	23.6
Materials expenses	57,820	24.5
Research grants	27,633	11.7
Facilities construction and maintenance	8,708	3.7
Repayment of long-term debt	5,245	2.2
Retirement stipends	3,770	1.6
<b>Total</b>	<b>235,840</b>	<b>100.0</b>

## Research income

Research income to the University comes from both the public and private sectors. Of the total amount of Grants-in-Aid for Scientific Research (*KAKENHI*) received from the government, half is used to support fundamental research, and about 10% goes to support young researchers. Nearly 1% of the total is from programs supporting new researchers and for women researchers returning to work after maternity leave.

## Intellectual property

Since university incorporation in 2004, the University of

Research income	Number	Amount (million yen)
Private sector research collaboration	1,622	5,628
Grants-in-Aid for Scientific Research ( <i>KAKENHI</i> )	5,025	23,847
Contracted research	Government competitive research funds	548
	Government non-competitive research funds	458
	Non-government research funds	260
Donations	16,465	9,783
<b>Total</b>	<b>24,378</b>	<b>68,396</b>

Patents held by	Domestic patents		International patents		Licensed patents		
	Applied for	Held	Applied for	Held	Licensed	Providing income	Income (000 yen)
University	4,413	957	3,796	710	2,352	922	1,683,266
Faculty	728	181	563	200	471	319	3,219,636
<b>Total</b>	<b>5,141</b>	<b>1,138</b>	<b>4,359</b>	<b>910</b>	<b>2,823</b>	<b>1,241</b>	<b>4,902,902</b>

Tokyo has increased the number of patents held by the University and by faculty members. Specialized licensing organizations (Todai TLO, CASTI) have been established to manage and monetize these patents. Other intellectual property including trademarks, software copyrights and other intangible assets provide income to the University.

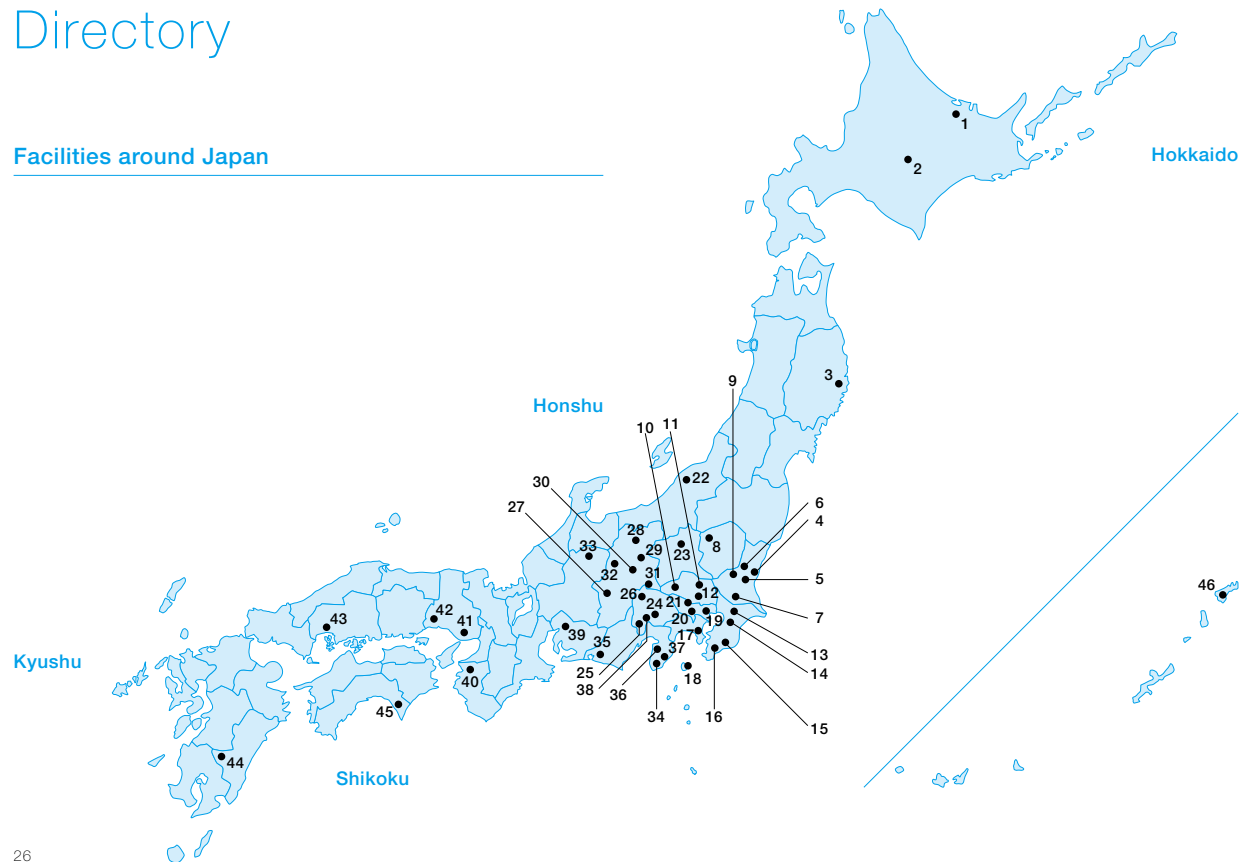

## The University of Tokyo Foundation

The University of Tokyo is supported in part by a range of gifts and donations from individuals and organizations, a large proportion of which are intended for specific purposes. Donations totaling 9.7 billion yen were received in financial 2013 by the University as a whole. After incorporation in 2004 the national universities established foundations, at which time the University of Tokyo Foundation was created to support the University's activities by strengthening its financial base. The Foundation's current balance is 10 billion yen. In financial 2013, the Foundation received 12,211 donations totaling 2.6 billion yen, 34% by value and 97% by number from individuals. The University is extremely grateful for this strong public support.

# Directory

## Facilities around Japan

### Seismology and volcanology

7. Tsukuba Seismological Observatory
11. Dodaira Seismological Observatory
16. Nokogiriyama Geophysical Observatory
17. Aburatsubo Geophysical Observatory
18. Izu-Oshima Volcano Observatory
22. Yahiko Geophysical Observatory
25. Fujigawa Geophysical Observatory
28. Shin-etsu Seismological Observatory
29. Asama Volcano Observatory
30. Komoro Observatory of Seismology and Volcanology (KOSV)
40. Wakayama Seismological Observatory
43. Hiroshima Seismological Observatory
44. Kirishima Volcano Observatory
45. Muroto Geophysical Observatory

### Life sciences

2. The University of Tokyo Hokkaido Forest
3. International Coastal Research Center
5. Animal Resource Science Center
8. Nikko Botanical Garden
10. The University of Tokyo Chichibu Forest
13. Experimental Station for Medicinal Plant Studies

15. The University of Tokyo Chiba Forest
17. Misaki Marine Biological Station
19. Koishikawa Botanical Garden
21. The University of Tokyo Tanashi Forest
21. Institute for Sustainable Agro-ecosystem Services
24. Fuji Iyashinomori Woodland Study Center
34. Arbicultural Research Institute
35. Fisheries Laboratory
39. Ecohydrology Research Institute
46. Amami Laboratory of Injurious Animals

### Observatories

20. Institute of Astronomy
26. Akeno Observatory
27. Kiso Observatory
31. Yatsugatake Geo-electromagnetic Observatory
32. Norikura Observatory
33. Kamioka Observatory

### Physics and engineering

4. Nuclear Professional School
4. Neutron Science Laboratory
6. Research Facility for Radiation Breeding

9. Kakioka Research Center
12. Center for Nuclear Study (Wako Branch at RIKEN)
14. Chiba Experiment Station
32. Suzuran Branch Office
33. Kamioka Satellite
41. Center of Computational Materials Science (Kobe Branch)
42. Synchrotron Radiation Laboratory (Harima Branch)

### Student houses

13. Kemigawa Athletic Ground, Seminar House
36. Student Hostel, Heda
37. Student Hostel, Shimokamo
38. Student Hostel, Yamanaka Naito Seminar House

### Other

1. Tokoro Research Laboratory
23. Tambara Institute of Mathematical Sciences

Data correct as of October 2014.
