Mission

The University of Tokyo aims to be a world-class platform for research and education, contributing to human knowledge in partnership with other leading global universities.

The University of Tokyo aims to nurture global leaders with a strong sense of public responsibility and a pioneering spirit, possessing both deep specialism and broad knowledge.

The University of Tokyo aims to expand the boundaries of human knowledge in partnership with society.

The University of Tokyo and Todai

In English we are known as the University of Tokyo and in Japanese as Tokyo Daigaku (東京大学), which literally translated is "Tokyo University." In Japanese, however, compound words are often abbreviated to just the first character of each component. Abbreviating Tokyo Daigaku leaves Todai (東大), which is how most people refer to us in Japan. In 2013, the University of Tokyo announced that the abbreviated English name of the University would be UTokyo.

Mission

About the University

The University of Tokyo is Japan's top university, a world-class center for research, and a vibrant academic community.

World-class research

The University of Tokyo's researchers have been at the forefront of their fields since our foundation in 1877. Today, their leading-edge research regularly appears in top international journals and has earned multiple Nobel Prizes. Research at the University of Tokyo across the arts and sciences is both broad and deep, as specialist knowledge is shared across traditional boundaries to further human understanding.

A robust education

The University of Tokyo's undergraduate education emphasizes the liberal arts for the acquisition of strong communication skills, a sound ethical framework, and interdisciplinary awareness, together creating a solid foundation for specialized knowledge. Volunteer activities, internships and other off-campus experiences are an increasingly important part of a University of Tokyo education.

A vibrant community

The University of Tokyo is a vibrant community in which world-class researchers work together with excellent students from Japan and more than 100 other countries. Alumni fill leading positions throughout Japan, Asia, and increasingly around the world.

Academic and administrative staff

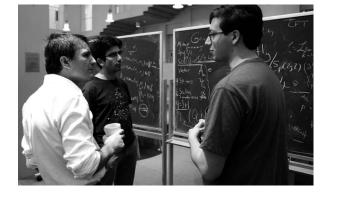

The University of Tokyo is a major employer with 10,526 staff members. Our academic staff numbers 5,914. The University lists positions as permanent or fixed-term, which applies to the post, not the person. About two-thirds of academic staff members (from research assistant to professor in the table) are in permanent posts and have tenure; the remainder are on fixed-term contracts. Most other staff members in permanent posts are on permanent contracts.

Academic and administrative staff	Pe	ermanent pos	sts	Fi	xed-term pos	ts	Total

Foreign academic and administrative staff

An increasing number of our staff members come from overseas. Currently, 9% of our faculty are foreign. In addition, many researchers visit us for short periods, creating an international environment in which our international staff can feel at home. The figures above include staff members in both permanent and fixed-term positions. The University is also exploring the joint appointment of faculty with overseas institutions in order to increase the number of foreign faculty members.

12 Organization 13

Education

Highly competitive admissions, extensive international partnerships, and a tradition of liberal arts education ensure that the University of Tokyo provides a diverse and highly stimulating intellectual environment.

A competitive environment

programs is successful.

14

Domestic students applying to the University of Tokyo take the common national university entrance examination, following which exceptional candidates can choose to take the University's demanding entrance examination. The number permitted to take this exam is limited so there can never be more than between 2.5 and five applicants for each position. The dates for graduate admissions vary widely. Please check the website of each Faculty or Graduate School for further information (page 28). On average, about one in four applicants to undergraduate programs is successful, and 47% to MA programs. Threequarters of applicants to PhD programs are successful, but this includes many students who enroll in combined MA/PhD programs. Roughly one in two external applicants to PhD

Degree programs offered in English

A growing number of graduate-level courses and degree programs are offered in English. Options in English for undergraduate students include the four-year degree program PEAK (Programs in English at Komaba) and the third-year transfer program GSC (Global Science Course). For more information on English programs at UTokyo, please visit the following websites: http://www.u-tokyo. ac.jp/en/prospective-students/undergraduate_english. html, http://www.u-tokyo.ac.jp/en/prospective-students/ graduate course list.html

Undergraduate education

Undergraduate education at the University of Tokyo is

divided into junior and senior divisions, each being two years in length. In the former, students study a liberal artsbased curriculum in one of three Humanities and Social

Undergraduate division	Applicants	Traditional entrants	Special entrants	Total entrants
Humanities and Social Sciences I	1,309	418	9	427
Humanities and Social Sciences II	1,097	357	8	365

Enrollment

The University of Tokyo has 27,377 regular students, roughly evenly divided between undergraduate and graduate students. Graduate students themselves are divided almost evenly between MA and PhD programs. International students number 2,526 or 9% of the total, with most enrolled in graduate programs. Male students outnumber female students four to one among domestic students. Of international students, 57% are male and 43% are female.

Study abroad

University of Tokyo students benefit from a wide range of academic exchange agreements with other universities. In 2014, 361 students visited our partner universities. Most of these were graduate students (73%). The University hopes to increase the number of undergraduates that make use of exchange opportunities.

International students

In May 2015, 3,062 international students were enrolled in programs at the University of Tokyo, 536 (18%) as research students and 2,526 (82%) as full-time students. Approximately 11% of international students studied at the undergraduate level, while around 89% studied at the graduate level. The University is increasing the number of programs available in English at both the undergraduate and graduate levels, so we expect to see an increase in the number of undergraduate international students in coming years. Additionally, many students join us for short periods during their studies at their home universities.

Admissions

Students can study at the University of Tokyo as either regular students (degree candidates) or research students. Admission is in April and September. To be eligible for admission to an undergraduate program, students should have completed twelve years of formal education equivalent to that in Japan, or have been awarded an International Baccalaureate by the International Bureau of Baccalaureates. (See the PEAK website for entrance requirements for that program.) To be eligible for an MA or PhD program, students should have at the time of admission a bachelor's or Master's degree or a level of education equivalent to that of a Japanese university. Eligibility for admission to a combined MA and PhD program is the same as that for an MA program. Students may also be admitted if the University recognizes that they have suitable academic background and experience to undertake their studies. Admission is granted to most programs after a written examination, but there are a few graduate programs that accept students on the basis of past academic attainments, letters of reference and essays. Please contact the relevant Faculty or Graduate School for more details (see page 28).

20 Education 21

Campus life

The university environment lets you focus on your research and studies so that you can perform at your best, but you are also a member of a community that provides effective support when the occasion demands.

Support for students and researchers

As the preeminent academic institution in Japan, the University of Tokyo has a long history of nurturing and promoting academic excellence. The International Center has offices on each of our main campuses and provides support for international students and researchers coming to study at the University and for our students studying at our partner institutions around the world. The International Center also offers advice on academic and personal matters, as well as mental health counseling for individual and family problems. The Center for Japanese Language Education provides Japanese language education for international students and researchers. The University Career Center arranges job fairs and provides information for students nearing the end of their studies.

www.u-tokyo.ac.jp/url/aac

Scholarships

Our domestic and international students are supported through the University's own scholarships and tuition fee waivers, and through scholarships from the Japanese government, companies and foundations. A large proportion of our international students are funded through such programs. One of the best places to start looking for information about scholarships is on our website. The Japan Student Services Organization (JASSO) website also provides details about scholarships and studying in Japan. Applicants are encouraged to apply for the Japanese Government (MEXT) scholarships, more information about which can be obtained from the Japanese consulate in your home country.

www.u-tokyo.ac.jp/url/aad, www.jasso.go.jp/index_e.html

Accommodations

Accommodations for students and researchers at the University of Tokyo are managed by the Housing Office. While University accommodation reserved for international students can house only a small portion of those who join us each year, the accommodations available are increasing and students also have access to student accommodation managed by other organizations, rooms in company dormitories and private accommodation. Further information is available on the University website.

www.u-tokyo.ac.jp/url/aab

Student life

At the University of Tokyo we value our links with society, and students organize two public festivals that provide visitors with a glimpse of university life. In addition, the University holds an annual open campus event which introduces university life to several thousand high school students from all over Japan each year. Increasingly, prospective international students also attend this event. Students also engage in a variety of sports and cultural activities through student clubs.

Research

Standing on the strong foundations built up by their predecessors, our researchers are consistently at the cutting edge across the full spectrum of academic endeavor.

Research facilities

Excellent facilities support research and education at the University of Tokyo, including a superb library system, the University Museum and two major hospitals, which are also open to the public and are a point of contact with the local community. Cutting-edge facilities including supercomputing resources support University members' research.

University Library System

While the General Library on the Hongo Campus contains a large collection of books, journals and other materials in Japanese, English and other languages, the majority of specialized materials are held in the 32 departmental libraries that comprise the University Library System. The system holds over 9 million books, nearly half of which are foreign. The largest portion of foreign books are in English, but there are also significant collections in other major languages. There are also over 160,000 journals, nearly half of which are in foreign languages. The Library actively purchases materials as required for research and education. An increasing quantity of material is digitized in the University Repository.

University Museum

The University Museum is the largest of its kind in Japan, with a collection of over three million items. The Museum holds materials to support research and education at the University of Tokyo gathered since the University's foundation in 1877, and fixed and mobile exhibitions are often open to the public.

Total	9,450,809	4,442,134	166,398	78,561	

Data correct as of March 2015.

University Hospitals

The University of Tokyo has two major hospitals, both of which were instrumental in the introduction of western medicine into Japan. The Faculty of Medicine University Hospital grew out of the Kanda Otamagaike Vaccination Center founded in 1858, and strives to provide the best possible individual care. The smaller Institute of Medical Science Research Hospital was established in 1894 and specializes in translational research, aiming to bridge the gap between basic research and the bedside.

Industry and government cooperation and outreach

The University of Tokyo is committed to ensuring the

transfer of our research outcomes to society, and industry cooperation is one of the most effective means of achieving this. Nearly 200 Japanese and foreign companies partner with us and fund almost 100 research projects, a mainstay of our research and one that provides a significant portion of research income. To support effective research and positive outcomes, collaborative research is first evaluated through the Proprius21 process, which ensures common understanding of research goals, establishes metrics and milestones for measuring progress, and determines ownership of results and intellectual property. In addition, the best of the University's research is promoted on the UTokyo Research website.

www.u-tokyo.ac.jp/url/aae

24 Research 25

Interdisciplinary research

The University of Tokyo promotes both inter- and intrauniversity interdisciplinary research, through the establishment of interdisciplinary institutes such as the Kavli Institute for the Physics and Mathematics of the Universe (Kavli IPMU), and networks of researchers from multiple disciplines across multiple universities, such as the Network for Education and Research on Asia and the Institute of Gerontology.

International research

The University of Tokyo aims to create a campus that is a premier platform for education and research and celebrates the world's diverse cultures, values, and languages. Consequently, the University of Tokyo is an important part of several regional and global university networks to promote collaboration in research and exchange of researchers, including the International Alliance of Research Universities (IARU), the Association of East Asian Research Universities (AEARU), and the Association of Pacific Rim Universities (APRU). Some of our world-leading institutes are created as centers of international cooperation, such as the Kavli IPMU.

Exchange of researchers

The University of Tokyo has signed over 400 academic exchange agreements, and our researchers make active use of these agreements to engage in research throughout the world. In 2014, researchers from the University of Tokyo registered 11,469 overseas research visits, and researchers from other institutions registered 3,731 visits to our campuses.

Region	Dispatched	Accepted

Total	11,469	3,731

Finances

As a national university corporation partly supported by the Japanese public, the University of Tokyo has a responsibility to ensure the efficient use of funding, and implements effective auditing and transparent accounting practices

2015 - 2016 Budgeted revenue

Nearly one-third of University income comes from government subsidies. Research grants and collaborative research with industry and government provide an additional one-third. The University Hospital is another major source of revenue, accounting for more than one-sixth of the total. Tuition fees account for approximately 8%.

2015 - 2016 Budgeted expenditure

Over one-third of the total expenditure is spent on research and research grants. Nearly another third goes to personnel costs. The remaining major expense is purchasing material items, which includes all research materials.

Budgeted revenue	Amount (million yen)	%
Government subsidies for management expenses	80,342	32.8
Collaborative research and endowment projects	61,691	25.2
University Hospital	45,225	18.5

Facilities construction and maintenance	13,281	5.4
Repayment of long-term debt	5,051	2.1
Retirement stipends	4,451	1.8
Total	244,591	100.0

Research income

Research income to the University comes from both the public and private sectors. Of the total amount of Grants-in-Aid for Scientific Research (KAKENHI) received from the government, over half is used to support fundamental research, and 16% goes to support young researchers.

Intellectual property

Since university incorporation in 2004, the University of Tokyo has increased the number of patents held by the University and by faculty members. Specialized licensing

organizations (Todai TLO, CASTI) have been established to manage and monetize these patents. Other intellectual property including trademarks, software copyrights and other intangible assets provide income to the University.

The University of Tokyo Foundation

The University of Tokyo is supported in part by a range of gifts and donations from individuals and organizations, a large proportion of which are intended for specific purposes. Donations totaling 9 billion yen were received in financial 2014 by the University as a whole. UTokyo became a national university corporation in 2004, at which time the University of Tokyo Foundation was created to support the University's activities by strengthening its financial base. The Foundation's current balance is 10 billion yen. In financial 2014, the Foundation received 12,346 donations totaling 2.5 billion yen, 53% by value and 97% by number from individuals. The University is extremely grateful for this strong public support.

Finances 29

Seismology and volcanology

- 7. Tsukuba Seismological Observatory
- 11. Dodaira Seismological Observatory
- 16. Nokogiriyama Geophysical Observatory
- 17. Aburatsubo Geophysical Observatory
- 18. Izu-Oshima Volcano Observatory
- 22. Yahiko Geophysical Observatory
- 25. Fujigawa Geophysical Observatory
- 28. Shin-etsu Seismological Observatory
- 29. Asama Volcano Observatory
- 30. Komoro Observatory of Seismology and Volcanology (KOSV)
- 40. Wakayama Seismological Observatory
- 42. Hiroshima Seismological Observatory
- 43. Kirishima Volcano Observatory
- 44. Muroto Geophysical Observatory

Life sciences

- 2. The University of Tokyo Hokkaido Forest
- 3. International Coastal Research Center
- 5. Animal Resource Science Center
- 8. Nikko Botanical Garden
- 10. The University of Tokyo Chichibu Forest
- 13. Experimental Station for Medicinal Plant Studies

- 15. The University of Tokyo Chiba Forest
- 17. Misaki Marine Biological Station
- 19. Koishikawa Botanical Garden
- 21. The University of Tokyo Tanashi Forest
- 21. Institute for Sustainable Agro-ecosystem Services
- 24. Fuji Iyashinomori Woodland Study Center
- 34. Arboricultural Research Institute
- 35. Fisheries Laboratory
- 39. Ecohydrology Research Institute
- 45. Amami Laboratory of Injurious Animals

Observatories

- 20. Institute of Astronomy
- 26. Akeno Observatory
- 27. Kiso Observatory
- 31. Yatsugatake Geo-electromagnetic Observatory
- 32. Norikura Observatory
- 33. Kamioka Observatory

Physics and engineering

- 4. Nuclear Professional School
- 4. Neutron Science Laboratory
- 6. Institute of Radiation Breeding

- 9. Kakioka Research Center
- Center for Nuclear Study
 (Wako Branch at RIKEN)
- 14. Chiba Experiment Station
- 32 Suzuran Branch Office
- 33. Kamioka Satellite
- 41. Synchrotron Radiation Laboratory (Harima Branch)

Student houses

- 13. Kemigawa Athletic Ground, Seminar House
- 36. Student Hostel, Heda
- 37. Student Hostel, Shimokamo
- 38. Student Hostel, Yamanaka Naito Seminar House

Other

- 1. Tokoro Research Laboratory
- 23. Tambara Institute of Mathematical Sciences

Data correct as of November 2015.
