

The 6th JIEPP Symposium

Exit Strategy for Highly Skilled Indian Talent After Studying at Japanese Universities and Graduate Schools

India, which became the world's most populous country in April 2023, is set to host the G20 summit in September 2023. Additionally, it was placed 9th position in terms of the high-quality research papers (top 1% adjusted paper count), surpassing Japan in this regard. India has also made significant strides in various fields, such as supplying talent to senior positions in global IT companies like Google. To accommodate students from India, which is experiencing such remarkable growth, Japan needs to demonstrate a comprehensive "exit strategy" for international students, outlining pathways for employment in Japan after graduating from universities or graduate schools.

In this symposium, we will invite speakers such as university faculty members who actively support the career development of undergraduate and graduate students, Japanese business owners operating in India, and former Indian students who have found employment in Japan as part of the discussion. Through their presentations and discussions, we aim to explore the collaboration and initiatives required by universities and businesses to further attract highly skilled Indian talent. They will show case studies and share their experiences in order to shed light on this topic.

Keynote Speakers

Prof. **OTANI Hiroki**
(Vice President, Shimane University)

Ms. **SHIGETA Naho**
(CEO, Infobridge Holdings Group)

Panelists

Ms. **Aarti DAAS**
(Matsue City,
Shimane Prefecture)

Dr. **Kiran Kumar GALI**
(Amano Enzyme Inc.)

Mr. **Sylvan KOYAGURA**
(Hitachi High-Tech
Corporation)

Facilitator

Prof. **WATANABE Satoshi**
(Special Advisor to the President,
Graduate School of Engineering,
the University of Tokyo)

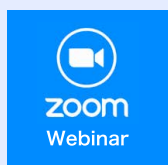

Jan., 24 Wed 2024
