

UTokyo Amgen Scholars Program 2022
Host Laboratories & Project Topics

Name of Faculty Member (Title)	TAKAHASHI Shin-Ichiro (Professor)
Name of Graduate School / Faculty/ Institute	Graduate School of Agricultural and Life Sciences
Research Topic & Research Description	Elucidation of molecular mechanisms of metabolic regulation by insulin-like signals and amino acid signals
Special academic conditions required for research	1) Prerequisite knowledge and/or specific skill and its proficiency
	Experiences or skills of the experiments in the fields of Biochemistry, and Cell Biology
	2) Required study field(s)
	Biochemistry, Cell Biology and Endocrinology
3) Academic background or research project experience to be considered at selection	3) Academic background or research project experience to be considered at selection
	Nothing special
Lab Website	http://webpark1586.sakura.ne.jp/OldWebPage/shingroup/English/index.html
Campus	Hongo·Yayoi
Academic Research Areas	Biochemistry Molecular, Cell and Developmental Biology Molecular Medicine
