

1. Program Objectives

Would you like to take online classes offered by the Australian National University (ANU)? This program offers a virtual “study abroad” experience to students with limited international experiences. Guided by the overall theme of “Coexistence”, this program provides students with an opportunity to learn about diverse topics such as the culture and history of Japanese and Australian native people, and the recovery from the Great East Japan Earthquake and its impact on the environment. In this program, UTokyo students interact with ANU students and increase the motivation for pursuing further global experiences or careers. The course is open to students of all years regardless of their disciplinary backgrounds.
