Soft Robotics

Robotics is gaining increasing importance across a wide range of applications, including industrial production, agriculture, assistance to individuals and households, and medicine. However, its progress is still constrained by the mechanical basis of construction and operation. The disadvantages of the constraints can be radically reduced by the advent of “soft robotics”. In this lecture, Prof. Viovy presents and illustrates the potentialities of this emerging field with a few examples, and discusses its future and potential limitations.

2024. **3.4** [Mon.]
15:00-16:30 JST

Speaker

**Jean Louis
VIOVY**

Tokyo College Professor,
The University of Tokyo
Research Director Emeritus,
CNRS-Institut Curie-IPGG

Commentator

ASAMA Hajime

Professor,
School of Engineering,
The University of Tokyo

Moderator

Flavia BALDARI

Project Researcher, Tokyo College,
The University of Tokyo

Venue

Zoom Webinar

Language

English (Japanese interpretation)
