What are the Lessons from Trump's Tariffs?

The 2025-2026 U.S. tariffs have been pursued in part to raise revenue, but also in an attempt to address international imbalances and alter the structure of the U.S. economy. Yet early evidence suggests that they have failed on all counts, creating inefficiency, disruption, and regressive tax burdens while also harming US partners. This lecture evaluates the results to explore implications for future economic policy.

2026. **11.11** [Wed.]
14:00-15:00 JST

Lecturer

**Kimberly
CLAUSING**

Professor,
University of California,
Los Angeles
